Mini Project

Analysis Of Student Feed Back

Duration : Apr, 2020 - May, 2020

Technologies : Python, Django, HTML, CSS

Description :

- Developed successfully a web application called student feedback analysis project. It mainly focuses on the current situation of gathering student feedback for their faculty in many educational institutions. In that case no one can summarize the performance of the faculty with feedback data. That problem is solved by using this project.
- This project visualize the data which is taken from the students with certain graphs and summary information.
- This project is developed by using the technologies Python programming language and Django web framework for back-end purpose. HTML and CSS are for front-end purpose.
